SeptoFipo Strips

Aluminum Oxide Coated Polyester Strips

SeptoFipo strips are recommended for finishing and polishing the proximal planes of composite restorations.

Each strip has fine and medium grits with a neutral space for ease in insertion. Use the neutral center to place the strip in the proximal space. Made from polyester with aluminum oxide coating, SeptoFipo strips do not leave marks on the restoration as they have no metal content.

Available in 2.5mm and 4mm widths
(7" long) 100 per box.

SeptoMatrix Sectional Retainers

SeptoMatrix Retainers

The SeptoMatrix System is composed of sectional matrices and reinforced rings: Blue (Hard) & Pink (Soft), for easy and fast construction of perfect, tight, contact points.

Triangular Tips

The SeptoMatrix System also includes triangular silicone tips for tight adjustment and contact points. Tips are autoclavable.

Matrices

The SeptoMatrix System also includes anatomical matrices. Available in large, medium and small. Matrices are autoclavable.

SeptoWheels PX

Solid felt wheels impregnated with ultra-fine dehydrated polishing paste, activated with a few drops of water, provide excellent polishing and natural shine on all surfaces. Comes with snap-on mandrel system.

SeptoWheels
Snap-on Mandrel

Felt wheels:
Great for post-bleaching

SeptoDiscs

Finishing and polishing discs for composites. Use with pop-on mandrel system, for easy and fast installation of the discs. One-sided abrasive surface for mesial and distal finishing.

SeptoDiscs
Pop-on Mandrel

SeptoWedges

Anatomically shaped for a better adjustment to the interproximal spaces. Available in 5 color-coded sizes.

#1 (yellow)

#2 (blue)

#3 (red)

#4 (violet)

#5 (natural)

#	HEIGHT	WIDTH	LENGTH
1	2.2mm	1.4mm	12mm
2	2.2mm	1.4mm	13mm
3	2.2mm	1.6mm	14mm
4	2.2mm	1.6mm	15mm
5	2.5mm	2.0mm	16mm
